

SERCRYL PU-304

PU-RESIN

Specifications:

Chemical composition:	Polyurethane resins, emulsifiers, water and additives.
Appearance:	Fluid liquid.
Color:	Colourless
Transparency:	Opalescent.
pH:	7,0±0,5
Active Matter:	20±1

General Properties of product family:

Micro-particle resins used in order to improve the looseness and grain break of crust leathers (specially cow and buffalo).

Used to prepare the leather for grounding and general finishing.

Used to improve the anchorage of ground coats or to regulate the penetration of finishings.

All resins are very soft and do not give hard leathers.

Good buffing behaviour.

We get smooth, very full and compacted grain.

Product properties:

Film hardness: Soft. Tacking

Coverage: Low.

Lightfastness: Exelent

To increase anchorage to all kind of finishings. High penetration. Special for anchorage in waterproofing articles.

Quimser complies with the European standards.
