

SEROIL TL

SULPHATED FATLIQUORS

Specifications:

Chemical composition: Sulphated fatliquor.

Appearance: Fluid liquid.

Color: Brown

Transparency: Transparent.

pH: 7,5±0,5

Active Matter: 70±2

General Properties of product family:

Sulphated fatliquors are produced by reaction of fats with sulphuric acid.

Leathers with very good round feel, filling or fullness can be achieved.

Provides soft leathers with good tight grain and elasticity.

Good light fastness.

Due to the excellent sulphatation grade, QUIMSER fatliquors provide a uniform distribution of fat in the inside of leather.

Very useful for all kind of articles like cow, sheep and goat.

Especially suitable for vegetable tanning leather.

Product properties:

General application . Napa, shoes, leather goods.

High concentration of sulphated base. It is very suitable for other quality sulphated fatliquor production.

Quimser complies with the European standards.
