

SEROIL MS

SULPHITED FATLIQUORS

Specifications:

Chemical composition:

Natural and synthetic sulphited fats.

Appearance:

Watery

Colour:

Dark brown.

pH:

7,5±0,5

% Active Matter:

70±2%

Light fastness:

Poor

Conductivity:

0,03 mS

Process:

Tanning
Re-chroming
Fatliquoring

Recommended:

Leather goods
Shoe nappa
Sole
Vaquetta
Veg. Belt
Split
Suede

Life time:

Properly stored (+5 and +35°C)
they last minimum 12 months.

General properties:

Seroil MS is a Sulphited base oil of general use for all soft articles. It is the combination of synthetic and natural oil.

It is very suitable to fat liquor vegetable tanned leathers due to it's do not promote oxidation and give even light and natural colour. It obtains a falling-off effect with a lot of inner softness with any filling effect and had good penetration and distribution. Suitable for vegetable tanning baths and for re-chroming baths but not suitable for chrome tanning baths.

Excellent stability to tanning baths and electrolytes (acids and alkalines). It can be used as a single fatliquor.

Guidance dosages:

Seroil MS is recommended for all kind of leather where required very good inner softness, nice touching with out looseness. It can be used as a sole fat liquor.

Application (% on shaved weight):

- Cowhide garment: 8-12%
- Shoe upper: 6-8%
- Suede split: 3-6%

In fat liquors mixtures (% on shaved weight):

- Upholstery: 4-6%
- Softy aniline: 4-6%
