

SEROIL SLL

LECITHIN BASE

Specifications:

Chemical composition:

Polymer fatliquor in lecithin base.

Appearance:

Liquid

Colour:

Brown.

pH:

7,5±0,5

% Active Matter:

49±2%

Light fastness:

Good

Charge:

Anionic

Process:

Retanning
Fatliquoring
Dye top
Re chroming

Recommended:

Fur leather
Garment
Glove
Upholstery
Shoe nappa
Leather goods
White leathers
Suede

Life time:

Properly stored (+5 Y +35°C) they last minimum 12 months.

General properties:

Seroil SLL liquid is a special lecithin based fat liquor with touching auxiliaries lanolin, waterproofing, cationic. It combines a high degree of softness with a smooth grain, low density feel and odour less, essential requirements for garment and nappa leathers. Seroil SLL is suitable to obtain leathers with superficial waxy-feel touch, getting leathers with round feel and fullness. It produce leathers with tight grain and springy feel. It has good light fastness. Good resistance to chrome, vegetable extracts, re chroming and neutralisation baths.

The main characteristics are:

- Outstanding softness
- Smooth, waxy feel touch.
- Low density feel

Guidance dosages:

Application

Seroil SLL is specially developed for maximum softness, it can be applied on all kind of soft articles e.g. softie shoe upper and fancy goods leathers, clothing, upholstery, etc. It can be used to good effect either on its own or in combination with other oils on all soft leathers

Unique fatliquor (% on shaved weight):

- Cowhide: 4-10%
- Nappa garment: 12-20%
- Upper shoe: 4-6%
- Gloving: 20-25%
- Combinated (% on shaved weight):
 - Cowhide: 1-4%
 - Nappa Garment: 1-6%
 - Upper shoe: 1-3%
 - Gloving: 6-10
